

NexusCloud Customer Support Master Handbook

Global Enterprise Customer Support & Technical Diagnostics Handbook

1. Company Overview & General Policies

NexusCloud provides enterprise cloud orchestration, AI agent APIs, and developer tooling.

Standard support hours are Monday through Friday, 8:00 AM to 8:00 PM EST. Enterprise tier subscribers receive 24/7/365 mission-critical support.

2. Return & Refund Policy

- **Standard 30-Day Money-Back Guarantee:** All self-serve monthly and annual subscription plans are eligible for a 100% full refund within 30 calendar days of initial purchase.
- **Physical Developer Hardware Kits:** Unopened hardware devices (e.g., Nexus Edge TPU developer kits) may be returned within 45 days. Must include all cables, original packaging, and intact serial barcodes.
- **Enterprise Contracts:** Enterprise custom agreements are subject to the Master Services Agreement (MSA) termination provisions. Monthly fees are non-refundable after the first 30 days unless an unresolved SLA breach occurs.
- **Refund Processing Time:** Approved refund requests are credited back to the original payment method within 5 to 7 business days.

3. Technical Error Codes & Resolution Runbooks

ERR-4032: Database Connection Timeout

- **Symptoms:** Applications fail to initialize or throw HTTP 504 gateway timeout during query execution.
- **Root Cause:** Database pool exhaustion or local SQLite/Chroma vector store lock contention during concurrent bulk indexing.
- **Resolution Steps:**
 - Restart the local backend service container using `docker-compose restart backend`.
 - Clear the browser client cache and reload the application.
 - Verify port 8000 is open and not blocked by local host firewall rules.
 - If using ChromaDB, delete stale lock files in `./chroma_db/chroma.sqlite3-wal`.

ERR-5001: Payment Gateway Token Timeout

- **Symptoms:** Customer checkout fails at Step 3; order remains in "Pending Authorization" state.
- **Root Cause:** Stale OAuth bearer token or expired Stripe/PayPal API session key.
- **Resolution Steps:**
 - Do not re-charge the customer immediately to avoid duplicate debit authorizations.
 - Navigate to Admin Dashboard > Integrations > Payment Gateway and click "Refresh Secret Tokens".
 - If payment was debited from customer bank without order generation, trigger an immediate ledger reversal or manual order provisioning within 2 hours.

AUTH-909: Webhook HMAC Signature Mismatch

- **Symptoms:** Inbound API event webhooks fail verification with HTTP 401 Unauthorized.
- **Resolution Steps:** Check system clock drift (NTP synchronization must be within 5 seconds). Regenerate the signing secret key in Developer Settings.

NET-204: Upstream LLM Inference Capacity Exceeded

- **Symptoms:** AI Agent returns HTTP 503 error or latency spikes above 15 seconds.
- **Resolution Steps:** Fall back to secondary local Ollama instance (llama3.2 or mistral) or route through local cache.

4. Account Tiers & Subscription Plans

- **Free Tier:** 1,000 monthly API calls, community Discord support, public documentation access.
- **Pro Developer Tier (\$49/month):** 50,000 monthly API calls, 4-hour ticket SLA, up to 10 vector knowledge base documents.
- **Enterprise Tier (\$499/month):** Unlimited API calls, dedicated Solutions Architect, 99.95% uptime SLA, 15-minute response time for Severity 1 outages.

5. Security & Data Protection

NexusCloud stores embeddings in an isolated vector partition per workspace. Customer queries and indexed documents are never transmitted to external third-party model providers when operating in local Ollama mode.
